Regulatory Infrastructure for Data-Driven Businesses

Battlegroup is an EU-based company providing advisory services for companies and investment ecosystems operating in data-intensive and regulated environments.

We help organizations build legally resilient data infrastructures and manage regulatory exposure under European and international data protection frameworks, including GDPR and the EU AI Act.

Our role is often equivalent to an external Data Protection Officer, embedded at executive level.

Why This Matters for Investors

Data regulation has become a structural risk factor in technology and cross-border investments.

Battlegroup supports investors and portfolio companies by helping them:

- design compliant data infrastructures
- manage cross-border data transfers
- navigate GDPR and EU AI Act obligations
- reduce regulatory exposure before scaling or fundraising

Typical Engagements

External Data Protection Officer (DPO)

Executive-level privacy governance for organizations processing personal data.

AI Governance & EU AI Act Compliance

Risk classification, governance frameworks and AI impact assessments.

Cross-Border Data Transfers

International transfer mechanisms, SCC implementation and multi-jurisdiction strategies.

Regulatory Audits & Investigations

GDPR audits, breach management and regulatory defense.

Clients & Ecosystems

Battlegroup supports organizations operating in high-data sectors, including:

- technology and AI companies
- healthcare and biotech
- financial services
- media, entertainment and production companies
- innovation ecosystems and investment structures

Strategic Focus

Building partnerships with:

- investment funds
- venture ecosystems
- international technology companies
- innovation hubs across Europe and emerging markets
